RFC-0032 Offerings By Government

- Open... Closes 09-08
- The FedRAMP Certification process is designed to establish a standardized process for commercial cloud services operated by private companies to assure agencies that their information will be protected.
- Government run CSPs are subject to all statutory and policy requirements for federal information systems by default
- Specific rulesets within the Consolidated Rules for 2026 are generally unnecessary for a cloud service that is operated by a federal agency
- FedRAMP will establish an Offerings by Government Ruleset:
 - Exempt agency cloud service providers from FedRAMP Rules except those in the Offerings By Government ruleset
 - Ruleset deviation is subject to Agency approval
 - Agency CSPs MUST have an ATO (no program certification paths)
 - Agencies must provide their own trust centers
