NTC-0011: Initial Outcomes from RFC-0025 Retrospective on the Public Comment Process

- Released May 27, 2026
- General response consensus
 - The process of transparency is appreciated
 - Lack of clarity on decision making process post RFC
 - The speed and number of RFCs this year was too much
 - 30 days in some cases is too little
- Changes to be made to the RFC process
 - No more than 3 RFCs at a time
 - General Comment themes will be added (see this notice for example)
 - 30 day period may be extended based on RFC size or response size

NTC-0012: Initial Outcomes of RFC-0031 Updated Incident Communications Procedures (ICP)

- Released June 03, 2026
- Transitions from ICP to Incident Evaluation and Communication (post notice)
- Focuses on Agency Impact vs Boundary
 - Name adjust from Potential Adverse Impact will be replaced with the plain language Potential Agency Impact (PAI)
 - Utilizes an N-rating system based on (PAIN 1-5)
- Initial, Ongoing, and Final reporting req timeframes based on PAIN and Class

NTC-0013: Initial Outcomes of Rev5 Baseline RFCs (RFC-0026 through RFC-0030)

- Released June 16, 2026
- This is a fundamental change than what was discussed in the May Community Update
 - The decision was made to move away from an overly prescriptive one size fits all minimums reqs
 - The FedRAMP parameter value rules went against the NIST intent
 - Control baselines are tailored based on a variety of factors, including threat information, mission or business requirements, types of systems, sector-specific requirements, specific technologies, operating environments, organizational assumptions and constraints, individuals' privacy interests, laws, executive orders, regulations, policies, directives, standards, or industry best practices.
 - FedRAMP removed most of the FedRAMP-assigned control parameter values
 - FedRAMP removed most of the FedRAMP-specific control guidance

NTC-0014: FedRAMP Response to CISA BOD 26-04 (Prioritizing Security Updates Based on Risk)

- Released June 16, 2026
- Overhauls vulnerability response requirements prioritizing vulnerability context over CVSS score
- CISA BOD and CR26 (VDR/VER) requirements were built in alignment with each other
- Our transition dates to VDR/VER were not...
 - New mandatory VDR/VER implementation dates: December 7, 2026
 - New mandatory VDR/VER grace period dates: March 7, 2027

Legacy Documentation Reference

Date	Milestone	Explanation
July 4, 2026	Optional Early Adoption	All stakeholders should begin incrementally adopting or transitioning to the Consolidated Rules for 2026.
July 6, 2026	Initial Implementation FedRAMP Marketplace Listings open	FedRAMP will begin allowing cloud service providers in the Initial Implementation Phase to be listed on the FedRAMP Marketplace following the Initial Implementation Rules.
July 28, 2026	FedRAMP Ready goes Legacy	No FedRAMP Ready submissions will be accepted after this date; providers should seek FedRAMP 20x Class A Certification instead.
August 3, 2026	FedRAMP Class A pipeline opens	FedRAMP will begin accepting applications for FedRAMP 20x Class A Certifications.
August 10, 2026	Temporary Rev5 Program Certification Pipelines Open for Class B and C	The Ready Conversion and Lost Sponsor pipelines open, allowing limited providers to apply for a Rev5 Class B or Class C Program Certification without an agency sponsor. See Choosing a Certification Path for details.
August 31, 2026	FedRAMP 20x Class B & C pipeline opens	FedRAMP will begin accepting applications for FedRAMP 20x Class B and C Certifications.
January 1, 2027	Mandatory Adoption	The Consolidated Rules for 2026 take mandatory effect for all stakeholders, subject to specific overall applicability and effective dates within certain areas. Over the next year, all cloud service providers are required to follow these rules to maintain FedRAMP Certification.
June 11, 2027	End of New Rev5 Certifications	FedRAMP will no longer accept applications for new FedRAMP Rev5 Certifications.

FR Minimum Assessment Scope

Overview FedRAMP Agencies Cloud Service Providers Independent Assessors Advisors Ruleset Reference

Reference The Minimum Assessment Scope rules help providers define assessment boundaries and ensure a thorough review of components that do not affect the offering's security. These rules still ensure the necessary connections needed to understand the offering's confidentiality, integrity, and availability.

CR26 Rule Applicability and Dates

- **Optional Adoption:** Gives CSPs the option of adopting early (may require notification)
 - **Obtain:** If you are a net new Certification, this is the date you must follow the rules
 - **Maintain:** If you have an active Certification, this is the date you must follow the rules
 - **Grace period:** The dates Corrective Action will start applying
-

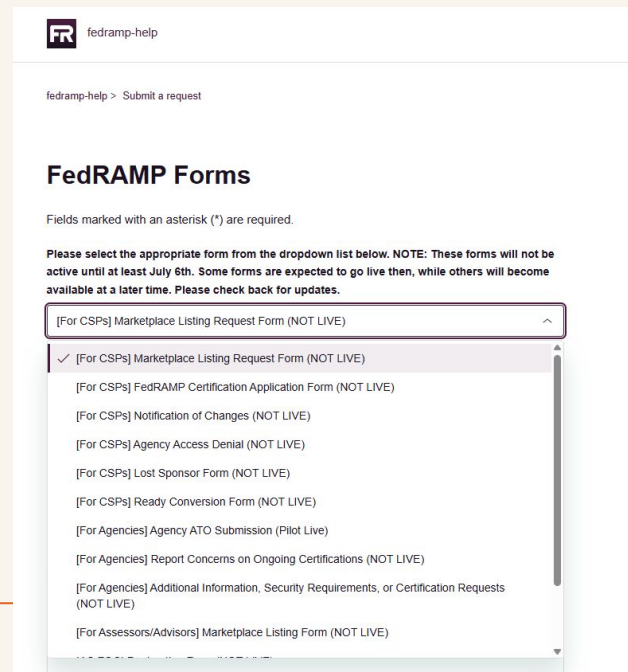

CR26 Transition from Templates

- CR26 moves away from FedRAMP mandated templates
- Information requirements are published in JSON and machine readable format in CR26
- Legacy Templates have moved and all have been stamped as Legacy
- Legacy documentation at fedramp.gov/legacy

Forms, Forms, Forms

- FedRAMP is in the process of automating workflows for ALL communications
- We have built and will start deploying forms for common actions
- Actively Piloting ATO submissions
- Upon implementation, we reject manual requests; link to form
- We expect issues...
- A quick look at current stats
 - Avg 14,000 unique tickets a year
 - Triage is 90% manual
 - Post cuts, there are 8 of us managing this as available

The screenshot shows a web interface for selecting a FedRAMP form. At the top, there is a logo with the letters 'FR' and the text 'fedramp-help'. Below this is a breadcrumb link 'fedramp-help > Submit a request'. The main heading is 'FedRAMP Forms'. A note states: 'Fields marked with an asterisk (*) are required.' Another note says: 'Please select the appropriate form from the dropdown list below. NOTE: These forms will not be active until at least July 6th. Some forms are expected to go live then, while others will become available at a later time. Please check back for updates.' A dropdown menu is open, showing a list of forms. The first option, '[For CSPs] Marketplace Listing Request Form (NOT LIVE)', is selected and highlighted. Other options include '[For CSPs] FedRAMP Certification Application Form (NOT LIVE)', '[For CSPs] Notification of Changes (NOT LIVE)', '[For CSPs] Agency Access Denial (NOT LIVE)', '[For CSPs] Lost Sponsor Form (NOT LIVE)', '[For CSPs] Ready Conversion Form (NOT LIVE)', '[For Agencies] Agency ATO Submission (Pilot Live)', '[For Agencies] Report Concerns on Ongoing Certifications (NOT LIVE)', '[For Agencies] Additional Information, Security Requirements, or Certification Requests (NOT LIVE)', and '[For Assessors/Advisors] Marketplace Listing Form (NOT LIVE)'.

Last but not least.....

The screenshot shows a web browser at `fedramp.gov/trivia/` displaying a game titled "Consolidated Ruleset RAMPpardy". The game's purpose is to test knowledge of the live FedRAMP Consolidated Ruleset for 2026 (CR26). The interface includes a score of 0, 25 clues left, and a "New random board" button. The game board consists of five categories: Textbook Definitions, KSI Miami, The Sacred Texts, Welcome to Whoville, and I Am The Law. Each category has five clue levels ranging from \$100 to \$500.
